

Office 365: Maximizing Your Investment

As an Office 365 customer you are already benefiting from cloud services with reduced on-premises costs and software management, but chances are you are still not making the most out of your investment into the cloud.

Modernize the Workplace

Prepare your business for the evolving workforce and provide your employees the tools they prefer to be productive.

Leverage the tools you already own to reduce wasted time and optimize business operations.

Take advantage of the security technologies integrated into Office 365 to ensure employee peace of mind and management confidence in data security.

Information overload wastes
25% of employee time and
costs the **US \$997B** annually.

Expand Adoption

Identify how to get more out of the Office 365 services and features you use today.

Plan for the future by mapping adoption of additional Office 365 services to the changing needs of your organization.

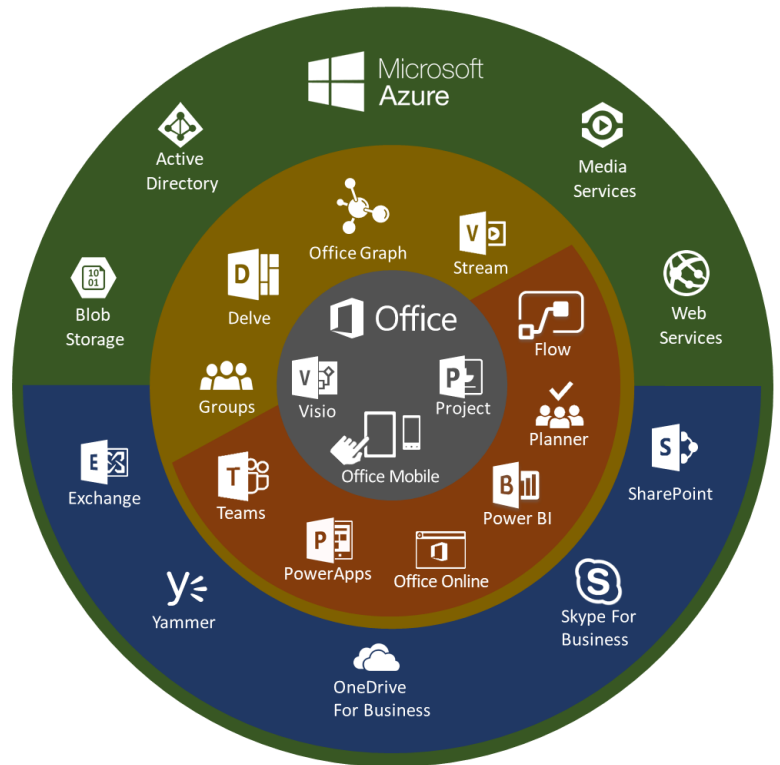

Today's businesses need to provide a modern workplace to attract and retain top talented employees, as well as encourage forward thinking that will help them grow.

Why this workshop matters

86% of companies who adopt Office 365 do so to address a specific need and never achieve the full value of their investment into cloud services.

Millennials will make up 75% of the workforce by 2025 requiring companies to adopt to a changing workforce.

Businesses that are unprepared to accommodate a diverse, multi-generational workforce will struggle with maintaining productivity and employee motivation.

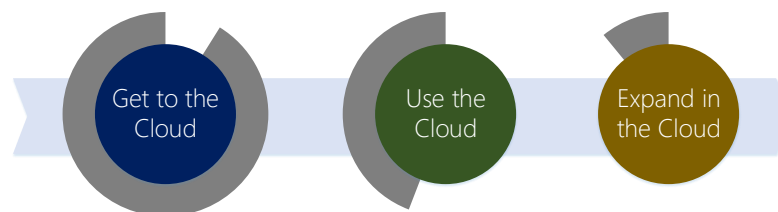

What this workshop does

Gain understanding of why businesses fail at full cloud adoption resulting in decreased ROI on investments in Office 365 services.

Learn about the full capabilities of Office 365, specifically for the services you already own and use today.

Identify how to better leverage the Office 365 productivity platform and reduce redundant solutions and costs with tools and features your employees need.

Prepare for the future and to accommodate a diverse workforce by enabling productivity addressing generational differences and employee preferences.
